DELTACAST.TV is dedicated to developing and manufacturing state-of-the-art products for the professional video market. More on www.deltacast.tv

DELTACAST.TV is looking for a:

Hardware Engineer

Your Mission

- Take part, as a team member, in the design and implementation of electronic hardware projects in various fields (professional video, camera design, embedded systems, etc.)
- Design of electronic systems including circuit board design (schematic, PCB), FPGA design (in VHDL), and embedded software (for micro-controllers and SoC)
- Take part in architecture and design brainstorming sessions
- Test & validation in our laboratory
- Product deployment in collaboration with customers
- Explore and implement new technologies in R&D and research projects

Your Profile

- Master's Degree in Electronic/Electrical/Mechatronics Engineering
- Experience in electronic circuit board design (schematics, PCB)
- Good knowledge of VHDL and FPGA design/simulation/debugging tools
- Knowledge of C language and experience with microcontrollers
- Good knowledge of French and English
- Passion for technology

Our Offer

- Our commitment is to highlight diversity and talents throughout a dynamic working environment.
- A competitive salary package with many extra-legal benefits, and a career enrichment program that ensures continuous learning and development of your skills.
- Be part of an enthusiastic and innovative team that experiences first-hand the challenges we face every second.

Working at **DELTACAST.TV** is a lot more than just a job...
