DELTACAST.TV is looking for a **QUALITY CONTROL ENGINEER**

Mission

o Define, implement and supervise the quality assurance processes related to DELTACAST.TV digital video products
o In collaboration with Product Owners, define and improve test strategies / test plans
o Assume technical responsibilities both during validation stages and quality processes all along the product lifecycle
o Define and review the implementation of test units and test benches
o Coordinate test execution (coverage analysis, test plan, manual test, automatic test writing, regression test, conformance test, long-run test, performance test,…)
o Create and maintain technical documentation
o Assess and report the quality of product releases
o Help team members in reaching a high level of competence and autonomy
o Ensure team members are following the company processes, test strategies and standards
o Ensure the capitalization and sharing of knowledge

Profile

o Master Degree in Computer Science or Electronic/Electrical Engineer
o Good and practical knowledge of software engineering, especially of QC methodology (e.g. ISTQB)
o Experience validating systems meeting high-performance, high-availability and real-time constraints
o Technical background of an architect or software engineer
o Good knowledge of French and English
o Capable of motivating and mentoring Software Engineers in Test Automation
o Strong communication and influencing skills
o Able to support and encourage innovative ideas, create and give space for curiosity
o Passion for technology
o Willing to display a strong team spirit and to contribute to the team knowledge

Technical Asset

o Strong background in software programming (C/C++, OOP)
o Experience in software designs that involve deep hardware and software interactions
o Experience in cross platform software development (Windows, Linux, MacOS)
o Master tools, techniques and methods of validating computer systems

Offer

o Challenging work and career evolution opportunities in a fast growing SME with international reputation.
o Join a team of talented and brotherly engineers.
o Competitive salary and conditions
