Ultra-low latency

ABOUT DELTACAST

Born from the TV broadcast industry, DELTACAST is a leader in the design, development and manufacturing of live video transport and processing solutions for OEMs and developers. Our solutions deliver the highest quality and the lowest latency to serve the most demanding applications in TV broadcasting, ProAV industry, medtech, aerospace and many other markets.

ISO 9001 Pro Cert

The quality management system developed by DELTACAST fulfills the requirements of the ISO 9001:2015 standard

INNOVATIVE SOLUTIONS

AI IMAGE PROCESSING

Automatic failover

- Real-time 4K overlays (SDI/HDMI)
- Automatic failover with passive bypass to preserve video signal in
- RDMA and ARM platforms support

IP SMPTE ST 2110

Expertise in IP and ready-to-use modules
ST2110, DPDK kernel bypass, PTP, NMOS

IP VIRTUAL CARD

- ST 2110 software ingest and playout on standard NICs
- Part of the unified VideoMaster SDK
- Up to 4K and more with very low CPU consumption
- Support for ST 2110-20 (uncompressed video), -22 (compressed streams -JPEG XS), -30 (audio), -40 (ancilliary data)
- Redundancy (ST 2022-7)
- Advanced performances with DPDK kernel bypass
- Virtualization ready

ULTIMATE LOW-LATENCY

- The shortest way to real-time
- Software defined ultra-low latency
- Sub-frame video-in to video-out

HIGH I/O DENSITY

FLEX

- Connect up to 32 I/O on a single PCIe slot
- External I/O modules for SDI, HDMI 2.0 and DisplayPort 1.2
- Frame accurate synchronization
- Up to 32x HD – 8x 4K
- Rack-mount design

100% UNDER YOUR CONTROL

VIDEOMASTER SDK

- ▷ Supports all DELTACAST video cards
- ▷ Unified framework with dedicated features for SDI, IP, HDMI, DVI, DISPLAYPORT and ASI
- ▷ Ultimate Low Latency with sub-frame access
- ▷ C/C++ API
- ▷ Drivers for Windows and Linux PC computers, MacOS, and ARM platforms
- ▷ NVIDIA GPUDirect RDMA support

FREE SOFTWARE APPLICATIONS AND DOCUMENTATION

- ▷ Comprehensive documentation
- ▷ Free applications :
  - dSCOPE: Cross-platform analyzer application
  - dCARE: All-in-one test bench for your DELTACAST cards
  - dREC: Easy-to-use cross-platform record and playback
  - dMOSAIC: Cross-platform multiviewer
 - E-DID Editor: EDID authoring application

THIRD PARTY FRAMEWORKS

UNREAL ENGINE

NVIDIA CLARA HOLOSCAN

Microsoft® DirectShow®

TAILORED TO YOUR NEEDS

CUSTOM DESIGN

Electronics, software & mechanics

Flexible OEM building blocks

Integration into a plethora of video applications

Custom firmware for any of our boards

PREMIUM SUPPORT

First-class technical support by email, or even by phone in case of critical needs.

- Video cards: included
- Software: part of DELTA-care

INTERFACING IS OUR WORK

SDI

8K Reliable BNC connectors

- More than 15 different models
- From 1 to 12 configurable in/out
- From SD to 8K
- SD/HD/3G/6G/12G-SDI
- Multi-link 4K and 8K transport in quadrant and in 2SI mode
- BNC, DIN or HD-BNC connectors
- HDR formats support
- Input synchronization, output genlocking
- Onboard LTC reference input, or through LTC optional module
- Automatic failover on some models

IP SMPTE ST 2110

- 2 x 10GbE ports via SFP+
- ST2110 and ST2022-5/6 stream capture and playout
- ST2022-7 - Seamless Protection Switching
- Mezzanine compression for 4K support
- Unicast and Multicast IGMP
- PTP support

HDMI™ / DISPLAYPORT™ / DVI

- HDMI™ 2.0 600 MHz TMDS clock
- HDMI video formats up to 4K60
- Audio capture
- High frame rate HD (up to 120Hz)
- HDR formats support
- 2 inputs
- Low-profile form factor
- DisplayPort and DVI support

MIXED VIDEO INTERFACES

- SDI, HDMI and DVB-ASI video interface
- Capture and playout low-profile card
